+31647255213 . Delft, Netherlands

ABOUT ME

I'm 18 and studying Software Development at Grafisch Lyceum Rotterdam. I really enjoy building things for the web, especially front-end where design and code come together. I'm especially strong in design and UI/UX and I want to keep pushing that. I'm also really into game dev — I love the creative side of building interactive experiences. I learn fast, work well on my own and in a team, and I'm always looking to grow.

WORK EXPERIENCE

Software Development Intern

Delta-N

Delft, Netherlands

2024

- Built a charging station web app from scratch as my main internship project
- Worked in a professional dev environment with real tools and deadlines
- Learned to solve problems independently and find solutions on my own
- Gained real experience building and maintaining web applications

ICT Intern

Gemeente Delft (Municipality of Delft)

Delft, Netherlands

2023

- Joined meetings and discussions about digital solutions for the city
- Built an interactive voting page for young people on the city website
- Worked with a team inside a large organisation
- Learned how to communicate ideas and work with stakeholders

PROJECTS

Charging Station App

PHP SQLite HTML CSS

Full web app for managing EV charging stations.
Built solo during my internship at Delta-N.

Municipal Voting Page

HTML CSS JavaScript

Interactive voting page for young people on the Delft city website - built during my internship.
